GAS REPORT IS FILED

Washington Company Submits Its Statement.

IS DECLARED UNSATISFACTORY

District Commissioners Say Bare Announcement of Receipts and Expenditures Does Not Make Plain Whether Corporation Can Reduce Present Price and Realize Profit.

Brief, unburdened with details, and directly to the point, is the statement of receipts and expenditures of the Washington Gaslight Company for its last fiscal year ended December 30, 1906, as submitted by that corporation to the District Commissioners. The full text of the report is as follows:

"In compliance with the law, I beg leave to submit the following statement of receipts and expenditures of the Washington Gaslight Company for its last fiscal year ended December 30, 1906:

Receipts.....	\$1,814,759.33
Expenditures.....	1,643,919.00
Respectfully,	

"W. R. ORME, Secretary."

This statement is submitted in accordance with the act of Congress of March 1, 1901, which provides: "That the electric, gas, and gaslight companies of the District of Columbia shall file with the Commissioners of the District of Columbia on the first day of August, 1902, and annually thereafter, a statement showing their receipts and expenditures for the previous year."

Detailed Statement Desired.

Since the passage of this act the Commissioners have repeatedly urged upon Congress the enactment of legislation reducing the price of gas to a rate commensurate with the cost of its manufacture, and at the same time compelling the submission to Congress of a sworn and detailed statement of the condition of the business of the gas company.

The stand taken by the Commissioners, that based upon such facts as are known relative to the cost of manufacturing gas, the product can be furnished at a less price than is charged for it in Washington. They hold that the gas companies having large and valuable franchises in the public streets, should be compelled to make a statement to the municipal authorities which shall make plain the ability of the corporations to sell gas at a cheaper rate or not to do so.

Reports Not Satisfactory.

The Commissioners hold that the reports submitted do neither of these things, hence their repeated efforts to have statements forthcoming at intervals from the gas companies which shall give some insight into the financial condition of the companies, especially their earning power, as compared with the price charged for gas.

Congress at the last session included the following recommendation in the District of Columbia appropriation bill of March 2, 1907:

Provided, That any association or corporation engaged in the manufacture and sale of gas for illuminating and fuel purposes in the District of Columbia, through its president or other duly authorized officer, shall make a sworn statement to Congress annually, on or before the first day of February in each year. Said report shall contain a detailed statement of the condition of the business of said association or corporation for the year ending December 31 next preceding, and such statement shall set forth the actual cost and also present value of the property of such association or corporation, in the conduct of its business, the amount of paid-up capital stock, the amount and character of the indebtedness of such association or corporation, the amount and cost of materials used in making gas, the amount of gas manufactured, the amount of gas sold, the average price per 1,000 cubic feet received for gas sold, the revenue from the sale of all by-products, the revenues from all other sources, the extensions and improvements made in the plant and works, the actual cost of the same, the amount expended for labor, the amount set aside for depreciation, the amount set apart for insurance and renewal, the amount paid for earnings for betterments, the amount paid for betterments from other sources, the amount set aside and paid in interest and dividends, the surplus after paying the corporate expenses and fixed charges, the statement of the operating expenses to be itemized and classified, as is done by other public utility corporations in the District of Columbia, the names of the stockholders and the amount of stock held in such association or corporation by each of them on December 31 next preceding the date of such report.

Any such association or corporation, not later than the 4th day of December, in the year 1907, shall make to Congress a sworn report in accordance with the requirements of this provision, and showing the condition of its business as near as its present method of bookkeeping will permit for the year ending December 31, 1906.

Senator La Follette and Representative Burleson were instrumental in securing the enactment of this law.

Will Renew Efforts.

The Commissioners again announce that at the next session of Congress they will renew their recommendation that the price of gas be reduced to 75 cents—if it is shown that such price will provide a fair profit to the gas company.

ASKS FOR BETTER STREET.

Surgeon General Wants E Street Northwest Improved.

W. H. Brownson, Acting Secretary of the Navy, in a letter to the Commissioners, states that the Surgeon General of the navy has invited the attention of the department to the urgent need of improving E street northwest, between Twenty-fourth and Twenty-fifth streets.

The improvements providing for the maintenance of the Naval Medical School Hospital and the additional building and grading of the government reservation which faces on E street from Twenty-third to Twenty-fourth streets cannot be carried into effect, it is stated, until E street has been improved.

The Commissioners announced yesterday that the request will be given careful consideration in the preparation of their next estimates to Congress.

Fire Department Test To-day.

In anticipation of a demonstration to be given October 9, 1907, before the members of the International Association of Fire Engineers, October 9, Chief W. T. Belt, of the fire department, has ordered a preliminary test to be given at the eleventh and Seventh streets and Pennsylvania avenue at 6 o'clock to-morrow morning. The following engines and trucks will participate in the test: Engines Nos. 1, 2, 3, 6, 13, 14, and 16; Trucks Nos. 1, 3, and 4 and the water tower.

The following promotions were made yesterday in the engineer department of the District to fill the vacancies caused by the death of A. Y. Lakenan, chief clerk of that department: Daniel E. Gargies, clerk at \$1,300, to clerk at \$1,500; E. E. Helm, clerk at \$1,500, to clerk at \$1,500; R. M. Barr, clerk at \$1,350 to clerk at \$1,500; E. R. Greer, clerk at \$1,300 to clerk at \$1,350, and R. L. Bradshaw, clerk at \$1,000, to clerk at \$1,050, all effective since August 1.

Open-air Sacred Concert To-morrow.

The Naval Gun Factory Band will give a sacred concert to-morrow (Sunday) and every Sunday during the entire summer at Randle Highlands from 3 to 6 p. m. Take Capital Traction Pa. ave. cars going east, marked F and G, and get free transfer to Randle Highlands. Only a few minutes' ride east of the Capitol. A magnificent view of the city and surrounding country from Randle Highlands.

HELP SUMMER OUTING WORK.

Employees of Department of Commerce and Labor Contribute.

In the Department of Commerce and Labor a special collection was taken up for the summer outing work of the Associated Charities. A woman who has been much interested in the outing work, and who has taken a party of boys to the woods herself, so that she realizes the pleasure which the summer outings committee is giving, inaugurated this collection. She asked for only 10 cents from each donor, and the contribution amounted to \$72.10.

Twenty-one colored children were sent out to Camp Pleasant from the southwest division of the Associated Charities yesterday. These children were suggested by the Colored Social Settlement workers, who are so well acquainted with conditions in the southwest.

BEACH WORK SCORED

Construction of Building for Bathers Called Poor.

SPECIFICATIONS DISREGARDED

Commissioner West Orders the Defects Corrected and Plans Carried Out to Extent of Funds Still Available for the Purpose—Bathers Will Be Compelled to Wait.

That the workmanship on the buildings at the new bathing beach is exceedingly poor is the report on the bathing beach contract made to Building Inspector Ashford by W. L. Webster, assistant inspector of buildings, in charge of construction. Mr. Webster says that he has made a thorough inspection of the buildings, accompanied by W. X. Stevens, superintendent of the bathing beach.

"The contractor," says Mr. Webster, "has done very little toward carrying out the interpretation that should have prevailed under this contract, owing to the nature of the buildings. There has been a continual contention since the inception of the work, which should militate against the contractor on future work. There has been no attempt to plumb level, or align any portion of the buildings. The flooring is out of level, in fact, one section, six feet wide, is from one to four inches out of level. The cornice is from one to eight inches out of alignment. The supports (brick) have been placed upon unstable soil, and will need immediate attention."

Specifications Disregarded.

"The specifications have been entirely disregarded as to the quality of lumber to be used. The cornices of fronts are in an unfinished state. The flooring condemned by the building inspector has not been touched. They have simply nailed up sheathings on the under side to keep daylight from showing through the top. Two valley gutters have not been properly formed and will be a menace to the roof gutter covering. In fact, any settlement from now on will change these conditions detrimentally. The interior partitions have been placed in many instances from two to four pieces in length in a three-foot length, and from two to four pieces in a six-foot length, which, owing to the nature of the work, should have been in one piece.

Mr. Webster recommends that the balance of the contract be applied to the absolute requirements of re-enforcing the building, and that a sufficient fund out of the maintenance fund be also applied to guard against the possible collapse of the buildings."

Inspector to Finish Work.

This report was submitted to Commissioner West with the result that the inspector of buildings was designated to correct the defects in the work, and complete the contract to the extent of the funds available for that purpose.

Twelve thousand dollars was appropriated by Congress for the construction of the new bathing beach and the contract awarded E. L. McClelland, whose bid was \$8,358. The balance due on this contract is \$2,188. By the terms of the contract the work should have been finished the latter part of June, but various delays have occurred, due principally, according to the contractor, to the scarcity of labor.

In view of the conditions as reported by Mr. Webster the exact date of the opening of the beach cannot be definitely stated.

The Greatest Three-Day CLOTHING SALE
